

Actively Exploring Energy Storage Application Scenarios In the era when the industry is fully shifting toward marketization, the reform of the ...

These innovations boost grid stability, efficiency, and sustainability. As renewable energy adoption accelerates, the future of ES is diverse, scalable, and intelligent. Explore more ...

China's energy storage industry is poised for rapid expansion through 2027, fueled by surging market demand and strong government backing. Industry leaders and ...

Aug 28, 2025 China Accelerates Green Energy Push With Major Projects, Spotlight on Energy Storage Aug 28, 2025 Lithuania Expands Energy Storage Plans to 1.7 GW/4 GWh Aug 27, 2025

5 · Policy China targets 180 GW of new energy storage by 2027 in ambitious national plan Announced by the National Development and Reform Commission (NDRC) and the National ...

The Energy Administration of Shandong province, in conjunction with 17 other departments, recently issued the guidelines on accelerating the high-quality development of ...

India strengthens its clean energy transition with major BESS policy updates, project wins, and 8.1 GWh of new tenders in July 2025.

Building a world-class energy storage material R& D platform Chongqing Energy Storage Research Institute accelerates the creation of new quality productivity

In Bollingstedt, a new battery storage facility aims to power 170,000 households, illustrating Germany's strategy to strengthen its energy infrastructure and stabilise its grid amid the rise of ...

Explore how AI-driven energy storage is powering the Chinese mainland's surge in renewables, helping the country reach carbon peak and neutrality goals through smart ESS ...

GCTL Accelerates Energy Transformation by Equipping Customers with New Energy Storage Technology Shanghai, 13 January 2023 - GCTL, a joint venture between GLP and ...

China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with ...

Chile plans to deploy five gigawatts of battery storage capacity by 2030, together with the commissioning of

New energy storage accelerates

the 3 GW Kimal-Lo Aguirre high-voltage direct current transmission line. This ...

As energy storage becomes a pillar of the global clean energy transition, the companies that master large-capacity cell technology will wield ...

In a bold move to meet EU emissions targets, Italy is accelerating its solar energy and industrial energy storage deployment under the PNIEC Italy plan. With installations ...

As demand for clean, renewable energy sources surges, there is growing consensus among industry experts that energy storage will play a pivotal role in driving green transition forward in ...

The decrease in costs of renewable energy and storage has not been well accounted for in energy modelling, which however will have a large effect on energy ...

Of this total, 101.3 GW stems from so-called "new energy storage" technologies--largely lithium-ion battery systems--representing a 110% year-on-year surge. ...

The Energy Administration of Shandong province, in conjunction with 17 other departments, recently issued the guidelines on accelerating the high-quality development of the new energy ...

New Zealand Energy Corp. accelerates the conversion of the Tariki field into a gas storage site to address market tensions in New Zealand.

2 · On this day, with the collaboration of the "Soo Super" and new energy as two major IPs, Changzhou tailored a "carnival" for citizens and fans, blending sports passion with technological ...

The deployment of "new type" energy storage capacity almost quadrupled in 2023 in China, increasing to 31.4GW, up from just 8.7GW in 2022, according to data from the ...

1 · On this day, with the co-branding of "Su Super" and new energy, Changzhou crafted a "carnival" tailored for citizens and fans that blended the passion of sports with the quiet flow of ...

The Coverage and Intensity of Policies Continuing to Increase Technological breakthrough and industrial application of new type storage are included in the 2023 energy work of the National ...

2 · New plan calls for expansion of energy-storage applications, including more projects in desert areas and at retired coal-fired power plant sites.

Trina Storage has announced it has reached a significant milestone, with more than 2.4 GWh of utility-scale storage capacity currently under execution across the Asia-Pacific ...

New energy storage accelerates

North China's Inner Mongolia autonomous region has made remarkable strides in developing new-type energy storage, achieving rapid growth in construction speed.

In terms of storage types, the dominant advantage of lithium-ion batteries continues to expand, accounting for 97.4% of the new type storage installation. Other types, such as air ...

With the acceleration of global energy transformation, the energy storage industry is ushering in unprecedented development opportunities. Energy storage technology, ...

Cold Electric Accelerates Expansion to Capture Global Energy Storage Opportunities Cold Electric is doubling revenue and fast-tracking expansion with a new Guanyin factory by year ...

North China's Inner Mongolia autonomous region has made remarkable strides in developing new-type energy storage, achieving rapid growth in construction speed and ...

Our commitment to delivering world-class integrated energy storage solutions to our customers is built upon employing cutting-edge renewable energy conversion and best-in-class battery ...

Towards a net zero target - storage fuels renewable transport investment in the UK In June 2019, the United Kingdom (UK) committed to reach a net-zero emission target by 2050. More ...
