

Ni mh aa 300mah 1 2 v solar battery

Are AA batteries compatible with NiMH batteries?

NiMH rechargeable AA batteries are compatible with applications that use AA cells because their 1.2-Volt standard output matches that of alkaline batteries. They can be combined in NiMH rechargeable battery packs for various uses.

What is a NiCd 300 mAh battery?

They are a direct replacement for the old NiCd 300 mAh battery. These 300mAh are used for all types of Solar Lights, the 300mAh capacity being the correct power for most Solar Garden Lights sold. They are fully rechargeable in your Garden Lights but when new, can benefit from a charge in a household battery charger to get them started.

What is a 300 mAh battery?

The 300mAh rating is a measure of how much energy they can store. Please check the batteries you are replacing are AA size. When your new battery arrives we would advise that you give the solar panels on your lights a quick clean and then leave the battery to charge for a couple of days.

What is the AA capacity of a NiMH AA battery?

The AA capacity of a NiMH AA battery usually ranges from 1200mAh to 2500mAh. This value refers to the standard charge and discharge capacity. For example, a 2500mAh NiMH AA battery means that under the 0.2C, standard charge/discharge to 1.0V, the capacity is 2500mAh.

Which AA battery should I use for my garden solar lights?

If you garden solar lights came with 1.2V 300mAh rechargeable AA batteries then this is the exact replacement. A lot of outdoor garden solar lights sold originally came with NiCd batteries, these are no longer available because of the cadmium content, we now offer the environmentally friendlier NiMH version.
