

# Nio solid state battery news

Does Nio have solid-state batteries?

WeLion has delivered its first semi-solid-state battery cells to Nio. Chinese electric vehicle (EV) manufacturer Nio recently announced a significant development in battery technology. The company has partnered with WeLion, a battery maker, to incorporate solid-state batteries into its electric vehicles.

Is Nio launching a semi-solid-state battery?

Electric vehicles are pushing boundaries, and Nio's entry into semi-solid-state batteries is generating quite a bit of publicity. YouTuber and EV enthusiast Ran recently embarked on a road trip spanning nearly 1,240 miles to put the new 150 kWh battery through its paces.

Does Nio have solid-state technology?

Following a period of development and refinement, Nio has begun incorporating solid-state technology into its lineup. The company filed documentation with China's Ministry of Industry and Information Technology, outlining its plans to equip several existing electric vehicle models with these enhanced battery packs from WeLion.

When will weLion deliver Nio solid-state batteries?

In December 2023, we reported on WeLion's progress in delivering the 360 Wh/kg solid-state batteries for NIO, which was going smoothly, with expectations of delivering the cells in mass quantities by April 2024. Five days into April, NIO is celebrating mass production of the semi-solid-state batteries as promised.

When will Nio launch a solid-state EV fleet?

Although Nio originally planned to begin developing its solid-state EV fleet in 2022, this announcement still comes with much hype and potential customers for the automaker. William Li, chairman, and CEO of Nio, confirmed for that the 150 kWh semi-solid-state battery pack will be available in July of 2023.

When do Nio batteries come out?

Nio reportedly received its first shipment of the batteries from WeLion on June 30, 2023, and says true mass production will begin in April 2024. Nio has filed with China's Ministry of Industry and Information Technology to use the batteries in over a dozen models.

Recently, Toyota claimed its technological breakthrough could result in a solid-state battery capable of delivering 745 miles range, with a charging time of just 10 minutes.

Days after Chinese automaker NIO showcased the massive range potential of its incoming 150 kWh solid-state batteries, their manufacturer, WeLion, shared some insight on when consumers can expect ...

William Li, Nio's co-founder and CEO, personally tested the new 150 kWh semi-solid state battery (SSB).

# Nio solid state battery news

While driving the Nio ET7 large sedan, Li and his co-driver reached a 1,044 km (650 miles) range with 3% ...

A Nio ET7 with the automaker's new 150-kwh battery pack traveled 650 miles on a single charge, the company claims. This was achieved by a group of drivers, including Nio founder and CEO William Li ...

The "holy grail" of EV battery tech may arrive sooner than expected, promising more range and faster charging. According to BYD head scientist and engineer Lian Yubo, solid-state EV batteries ...

In a solid-state battery, the make-up is simplified. The liquid is replaced by a solid block, which is lighter than its counterpart and can carry more energy within the same capacity.

Hot on the heels of the new Nio ES6 (EL5 in Europe) being unveiled, it has been revealed that the electric SUV will be the brand's first model to be offered with a solid ...

BEIJING - NIO, the Chinese electric vehicle manufacturer, has made a significant breakthrough in EV technology by introducing a solid-state battery pack with exceptional energy density, allowing for a range of over 930 ...

NIO has officially announced today a groundbreaking upcoming battery option for its electric cars - 150 kWh battery packs, consisting solid-state cells.

The 150 kWh battery pack with 95% solid electrolyte of the refreshed NIO ET7 was able to propel it to more than 600 miles on a charge in three separate test scenarios.

Nio's (NYSE: NIO) 150-kWh semi-solid-state battery pack is finally going to start entering service in a few months, after several delays. The 150-kWh ultra-long-range battery ...

Solid-state batteries promise faster charging, longer range, and increased safety. While still in their infancy, advancements like Nio's semi-solid-state battery are paving the way ...

Samsung is on track to meet its timeline for delivering an oxide solid-state battery with the highest energy density in the industry. Initially setting a goal of introducing ...

NIO and its suppliers are forging a new path in China's EV market. WeLion New Energy Technology, NIO's semi-solid-state EV battery maker, saw a 31% increase in installations last month. The ...

Chinese electric vehicle automaker NIO has implemented a 150 kWh solid-state battery pack in its cars. The solid-state pack is supplied by WeLion and will debut on the ...

A Nio owner tested out the startup automaker's new 150-kilowatt-hour "semi-solid state" battery pack. He managed to travel 554 miles before needing to recharge.

Will Nio's Semi-Solid State Battery Launch in the US? Nio EVs are only sold in China and Europe, as high tariffs have prevented Chinese EVs from reaching US soil, The ...

Nio's introduction of solid-state batteries is a significant milestone in the EV industry, signaling a shift towards more efficient, long-lasting, and environmentally friendly ...

Two and a half years after first sharing plans to implement a 150 kWh solid-state battery pack in its EVs, NIO appears poised to finally do just that. The automaker's digital user manuals now ...

The Chinese company's 150 kWh solid-state battery pack contains a solid electrolyte compared to the liquid electrolyte found in standard lithium-ion batteries. NIO's battery includes an anode made from silicon ...

Streng genommen handelt es sich um eine Semi-Solid State Battery (SSSB), also nur eine "halbe" Festk&#246;rperbatterie. Entwickelt wurde der Akku von WeLion, einem Batteriespezialisten aus Peking. Die ganze Batterie wiegt nur 575 Kilo, ...

Chinese automaker Nio recently announced the commercial roll-out of what can be called as one of the earliest solid state battery pack designed for EVs at the global level.

Solid-state batteries promise faster charging, longer range, and increased safety. While still in their infancy, advancements like Nio's semi-solid-state battery are paving the way for a future where range anxiety is a relic of ...

Less than a month after beginning mass production of its new semi-solid-state battery packs, NIO has opened the technology to the public in China to trial this month, ahead of a full rollout of ...

Nio's (NYSE: NIO) 150-kWh semi-solid-state battery pack is finally going to start entering service in a few months, after several delays. The 150-kWh ultra-long-range battery pack will go live in the second quarter, the ...

Days after Chinese automaker NIO showcased the massive range potential of its incoming 150 kWh solid-state batteries, their manufacturer, WeLion, shared some insight on ...

Nio wants to significantly expand the use of battery packs with semi-solid-state cells in its electric cars - potentially to eleven more models, according to documents from ...

BEIJING - NIO, the Chinese electric vehicle manufacturer, has made a significant breakthrough in EV technology by introducing a solid-state battery pack with ...

NIO is celebrating a potentially impactful milestone today. With the help of partner WeLion, NIO has begun

mass production of its 150 kWh semi-solid-state batteries.

A Leap Forward Nio's 150 kWh semi-solid-state battery pack boasts impressive specs: an energy density of 261 Wh/kg and only a modest increase in weight compared to its predecessors. This development is not just ...

On November 22, WeLion saw the first solid-state power battery cell roll off the production line at its battery manufacturing facility in Huzhou, Zhejiang province in eastern China, the company ...

Chinese electric vehicle automaker NIO has implemented a 150 kWh solid-state battery pack in its cars. The solid-state pack is supplied by WeLion and will debut on the upcoming ES6 SUV.

NIO's semi-solid-state battery supplier WeLion closes about \$200 million in new funding. NIO's semi-solid-state battery supplier, Beijing WeLion New Energy Technology, ...
