

Nsw solar battery scheme

What is the solar battery rebate NSW scheme?

The solar battery rebate NSW scheme targets new battery installations and connections to Virtual Power Plants. To solar battery rebate NSW eligibility for the rebate, applicants must meet specific criteria:

What is New South Wales' new solar battery incentive scheme?

Commencing November 1, 2024, a revamped solar battery incentive scheme will launch in New South Wales (NSW), providing homeowners and businesses with a unique opportunity to enhance their solar energy systems by adding battery storage.

How much does a solar home battery cost in NSW?

Under the State Government scheme, NSW households are being offered up to \$1500 to install and connect their new solar home battery to a Virtual Power Plant (VPP), which can also be accessed after purchasing a home battery under the Commonwealth's Cheaper Home Battery program, which provides a discount of up to 30 per cent on the purchase.

Do batteries pay for themselves in NSW?

The good news is batteries can still pay for themselves in NSW with only the federal battery rebate. If you have arranged to get a battery installed with the expectation of receiving both the federal and NSW battery rebates, it can still be worthwhile even without the NSW state incentive.

Who is eligible for a solar & battery system in NSW?

Eligibility: Available to homes and small businesses in NSW with existing solar systems or those installing combined solar and battery systems. Purpose: To reduce the initial costs of battery installation, enabling users to store excess solar energy and reduce reliance on grid electricity.

Why should you install a solar battery in NSW?

By taking advantage of the new NSW solar battery incentive, homeowners and businesses can significantly reduce the upfront costs of battery installation, making solar power more affordable and accessible. Beyond cost savings, installing a solar battery offers long-term benefits.
