

# Persist in learning and accumulating energy

What is learning persistence?

Learning persistence refers to an individual's behavioral tendency to continue learning and persevere in efforts despite encountering learning difficulties, obstacles, discouragement, or unrelated external stimuli (Padilla-Walker et al., 2013; Ross et al., 2018).

Do learning interest and persistence predict self-regulated learning behaviors?

Learning interest and persistence can significantly predict students' strategies for self-regulated learning behaviors. These paths were consistent with previous studies because students who are interested in particular tasks use more strategies for self-regulated learning than those without such interest (Fryer & Ainley, 2019).

Does learning persistence predict learning interest?

Then, as the positive relationship between self-regulated learning behavior strategies and academic performance has been described previously, it is hypothesized that learning persistence may also predict learning interest through the chain-mediated effects of strategies for self-regulated learning behaviors and academic performance.

Why is persistence important in learning CFL?

Learners' motivated behavior and persistence in learning CFL is, thus, more relevant to their personality characteristic of perseverance, representing how much learners are able to work hard and concentrate on the task without being discouraged by difficulties or adversity.

Do L2 learners need motivation and persistence?

Including the learners who have discontinued their L2 studies could help understand the issue of L2 motivation and persistence from a different angle. L2 learning is usually a long process, and people could not complete the learning process without sufficient motivation (Dörnyei & Ushioda, 2011).

Are learning interest and learning persistence reciprocal?

Learning interest (internal driving motivation) and learning persistence (explicit behaviors) are important factors affecting students' academic development, yet whether they operate reciprocally and how to bolster them are still issues requiring attention.

It is not hard to understand that such processes of overcoming something undesirable--depending on the task--consume energy. Consequently, fostering interest ...

When you learn for the pleasure of learning, you are more likely to share your knowledge and skills with others, enhancing both personal and community ...

# Persist in learning and accumulating energy

Academic effort in general is conceptualized as the amount of time and energy that people expend on academic tasks. Moreover, individuals who report high academic effort ...
