

Portable battery pack with solar panel

What are portable solar panels & solar battery chargers?

Portable solar panels and solar battery chargers are easy-to-use devices that provide backup power to anyone who happens to be away from a working power outlet, including hikers, car campers, and even people looking to keep their devices running during a power outage at home.

What are portable solar panels?

“Portable solar panels” are their larger, heavier, and higher-power siblings. Many portable solar panels are designed to charge an intermediary portable power station--often via a DC connector--but some are also equipped with USB ports that can charge small personal electronics directly.

Can a solar battery charge a portable power station?

Some of the higher-wattage models can help keep a portable power station charged, for running appliances like mini-fridges, lights, or air conditioners. Consumer Reports recently evaluated solar battery chargers and portable solar panels from a number of popular manufacturers, including Jackery, Allpowers, Renogy, and BigBlue.

Should you buy a portable solar battery charger?

A portable solar battery charger is a great option if you're taking an extended camping trip or traveling somewhere with an unreliable power grid, as it'll allow you to charge a phone the size of an iPhone 15 using just a few hours of midday sun.

What is a solar battery charger?

When you're shopping, the terminology can be confusing. By “solar battery chargers,” we mean lightweight, lower-wattage devices that can directly charge personal electronics while on the go, typically via USB port. “Portable solar panels” are their larger, heavier, and higher-power siblings.

How do you charge a portable solar power system?

Other people use them to power speakers while tailgating, or integrate them into van build projects. Most portable solar power systems -- aka solar generators, power stations, portable power banks or battery boxes -- can be charged via solar panels, a wall plug or a 12-volt car outlet.

CR's experts pick the best portable solar panels and battery chargers to power devices like phones and laptops, plus back-up batteries and power stations.
