

# Prius battery for solar system

I turn a 200v battery into a 14v battery. Safety Warnings- wear gloves when handling live battery. Never charge the battery outside of the clamping system as batteries expand during charging...

2.1K Advanced Solar Electric Technical Forum 5.6K Off Grid Solar & Battery Systems 428 Caravan, Recreational Vehicle, and Marine Power Systems 1.1K Grid Tie and Grid Interactive ...

Using a Prius hybrid battery in a solar system could violate safety and regulatory standards designed to protect users and equipment. Each type of battery comes with its own ...

I bought another Prius battery from Sam's, they sell Duracell. The resistance is 4.5 - still a disappointing number. But the CCA is measuring 650 instead of Costco/Interstate battery ...

Any thoughts on using the Prius with a traditional off-grid 48 volt system (Seems as if most ~ 4000 watt off grid systems will use 48 DC volt systems)? It does appear possible to use a charge ...

While there's interest in using Prius batteries for solar energy systems, a direct application is not feasible without significant modifications. Hybrid vehicle batteries, particularly ...

On another forum members are arguing that two chargers in parallel (AC and solar) should be isolated from each other with diodes to prevent &quot;backfeeding&quot;.

Well you don't have more solar than you need if you regularly fall below 50%. Even the plug in Prius has less than a 5 kWh battery. Great cars for fuel economy, wandering ...

No, you cannot directly use a Prius battery for your solar energy system. Prius batteries, specifically nickel-metal hydride (NiMH) or lithium-ion batteries, are designed for ...

The message that says: &quot;Check hybrid system. Stop in a safe place.&quot; Ask yourself this, are you equipped to check the hybrid system? Very, very few are. Prius are weird. Good cars but ...

So I bought a 240,000 mile 2012 Prius for \$2500 knowing the EV battery is about gone and there is a &quot;noise in the ABS system&quot; though the brakes are currently working very well.

There is one exception to #3. It is possible to run a water pump with a properly sized PV array and specialized pump controller, with no battery. Not the system you have, but it is possible to do ...

I'm looking at the Prius plug-in to the house as a co-generation as well as keeping the car at operating
