

# Profit analysis of new energy storage battery companies

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

Are energy storage and battery technologies comparable?

However, because different energy storage and battery technologies are easily comparable in terms of their economic viability, it makes sense to use a cohort of battery tech companies to try and gauge the median multiples for the sector.

What is the market share of battery energy storage systems in 2024?

By connection type, on-grid installations held a 78% share of the battery energy storage system market in 2024; off-grid applications are the fastest-growing segment at 18.5% CAGR. By component, battery packs, and racks represented 63% revenue share in 2024; energy-management software is advancing the fastest, at 20% CAGR.

What is a battery energy storage system?

Battery energy storage systems (BESS) are rechargeable batteries that can store energy from different sources and discharge it when required. BESS consists of one or more batteries that can balance the electric grid, deliver backup power, and enhance grid stability.

Is energy storage a profitable business model?

Although academic analysis finds that business models for energy storage are largely unprofitable, annual deployment of storage capacity is globally on the rise (IEA, 2020). One reason may be generous subsidy support and non-financial drivers like a first-mover advantage (Wood Mackenzie, 2019).

Is solid-state battery commercialization the future of energy storage?

Another critical area of focus is solid-state battery commercialization, which represents a high-stakes frontier for future energy storage. Companies like QuantumScape, Solid Power, and Toyota are at the forefront of solid-state battery development, promising significant advancements in energy density, charging speed, and safety.
