

# Promote the development of new energy storage bases

What is China's new energy storage plan?

The plan said that the new-energy storage industry is a key source of support for advancing the construction of a manufacturing powerhouse and promoting the efficient development and utilization of new-energy resources. By 2027, China aims to cultivate three to five leading enterprises in the ecosystem.

How can China improve the value chain of new-energy storage manufacturing?

To enhance support for the value chain of relevant manufacturing enterprises and foster a service-oriented manufacturing model, China seeks to drive the extensive adoption of next-generation information technologies, including blockchain, big data, artificial intelligence and 5G, within the new-energy storage manufacturing sector, the plan said.

What is the 14th five-year plan for energy storage?

The "14th Five-Year Plan" has specified development goals for energy storage also on the provincial level. During the "14th FYP" period, 25 provinces and cities plan to complete 77.65 GW new type storage installation. That scale is more than twice the "14th FYP" target (30 GW) set by the NEA.

How many energy storage policies does China have in 2024?

"China has consistently supported the development of critical minerals, and this plan serves as a comprehensive guide for the industry, steering it steadily toward sustainable development," Lin added. China released 770 energy storage-related policies in 2024, with 77 issued at the national level, the Xinhua News Agency reported.

Is cost reduction a key priority for China's energy-storage industry?

Cost reduction is one of the key priorities for China's energy-storage industry, which is essential to achieving targets, Lin Boqiang, director of the China Center for Energy Economics Research at Xiamen University, told the Global Times on Monday.

What is the scope of energy storage in the PRC?

" , " People's Government of the PRC, 3 Jan 2023, at <https://> The scope includes two categories: dispatch-controlled new type energy storage and self-used new type energy storage by power stations.

Then, on June 10, the National Energy Administration held a video conference to promote the development and construction of pumped ...

Zhang also said the NEA will work to improve the reliability of nonfossil energy to form a diversified clean energy supply system that includes wind, solar, hydropower, biomass, ...

# Promote the development of new energy storage bases

To promote the high-quality development of pumped storage, the next step should consider the development needs of the power system and the construction needs of ...

Facilitate the development of a carbon footprint certification system and a whole-lifecycle traceability system for energy storage lithium batteries. Accelerate the recruitment and ...

Accelerate the pilot demonstration of new energy storage technologies and key regions, and timely summarize the practices and successful experiences that can be replicated ...

The document also encouraged the exploration of new scenarios for the integration of energy storage development around distributed new energy, microgrids, data ...

An action plan is issued, aiming to build a growth engine such as new generation information technology and new energy, and promote the high-quality development ...

Energy storage technology is a critical component in supporting the construction of new power systems and promoting the low-carbon ...

2. New plan calls for expansion of energy-storage applications, including more projects in desert areas and at retired coal-fired power plant sites.

The New-type Pumped Storage and Water Transfer in Western China and the Research on the Development of Clean Energy Bases in China are published by the China Electric Power Press ...

On March 4th, in order to encourage all kinds of investors to make full use of desert areas to promote the construction of wind generation, ...

2. Implement demonstration application scenario expansion actions to promote the application of energy storage on the power supply and grid side. Actively encourage thermal power to ...

On the power supply side, accelerate the construction of system-friendly new energy power stations, support the transmission of high-proportion renewable energy bases ...

Promote the mutual support and coordinated development of new energy storage technology innovation and standardization. Support the establishment of a new energy storage standard ...

IV. Promote energy storage and consumption, and utilize renewable energy in a high proportion (1) Improve the storage capability of renewable energy (2) Promoting local and ...

First of all, the country plans to significantly increase its renewable energy supply by developing large-scale

## Promote the development of new energy storage bases

wind and solar power bases, particularly in desert and arid ...

BEIJING, Jan. 24 (Xinhua) -- China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

5 &#0183; China plans to more than double its energy storage capacity in the next two years to further accelerate the deployment of renewables.

On Feb. 10, 2025, China's Ministry of Industry and Information Technology and other seven central government departments jointly announced an action plan for sound development of ...

On one hand, we will continue to strengthen accommodation of power generated from new energy and cross-regional transmission capacity, promote the centralized development of wind and PV ...

Driven by the national strategic goals of carbon peaking and carbon neutrality, energy storage, as an important technology and basic ...

As the conventional energy resources are limited and environmental problems are becoming increasingly prominent, new energy resources, being environmental friendly and ...

Carry out research on the configuration of new energy storage for offshore wind power; promote the rational configuration of new energy storage for coal-fired power; explore the development ...

The energy storage bases in Jiangmen are pivotal to the development of sustainable energy solutions. 1. Jiangmen serves as a central hub for various energy storage ...

Strengthen the coordination of current energy and power system related standards and energy storage applications, and promote the establishment of safety standards ...

China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with ...

BEIJING, Feb. 17 (Xinhua) -- Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to ...

Strengthen the coordination of current energy and power system related standards and energy storage applications, and promote the establishment of safety standards and management ...

5 &#0183; The plan encourages the development of energy storage facilities that can serve as alternatives to traditional grid infrastructure, as well as broader use of grid-based storage ...

## Promote the development of new energy storage bases

Building a Modern Infrastructure System We will promote the coordinated development of traditional and new infrastructure and build a modern infrastructure system that is complete, ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

On June 5, the Guangdong Provincial Development and Reform Commission and the Guangdong Provincial Energy Bureau issued Measures to Promote the Development of ...

We will integrate new energy storage ontology technology, support breakthroughs in efficient integration and intelligent regulation technologies, focus on multi ...
