

# Prospects of my country s energy storage industry

What is the growth rate of the energy storage industry?

The energy storage industry recorded an annual growth rate of 5.69% with sustained market momentum of innovation, global demand, and clean energy policies. The market is valued at USD 288.97 billion in 2025 and is projected to reach USD 569.39 billion by 2034 with a 7.87% compound annual growth rate (CAGR) for 2025-2034.

Who are the top investors in the energy storage industry?

The top investors in the energy storage industry have collectively contributed more than USD 34.1 billion to the sector. Here's a breakdown of the leading contributors: Rabobank has supported 268 companies with USD 5 billion, supporting the expansion of large-scale energy storage like 420 MWh. KKR has deployed USD 4.4 billion into 11 companies.

Why should we study energy storage technology?

It enhances our understanding, from a macro perspective, of the development and evolution patterns of different specific energy storage technologies, predicts potential technological breakthroughs and innovations in the future, and provides more comprehensive and detailed basis for stakeholders in their technological innovation strategies.

Which countries publish the most energy storage publications?

Thermal energy storage and chemical energy storage have similar overall publication volumes, with China and Europe leading the way. The United States demonstrates an initial increase in publication numbers, followed by stable fluctuations, while Japan maintains a relatively consistent level of publications within a certain range.

Is energy storage a good investment?

The energy storage sector scales technologically and attracts decent investment activity. It undergoes an average investment value of USD 92.1 million per round. Over 10 280 funding rounds are closed to date, which indicates a consistently active funding pipeline.

Which countries have a literature search for energy storage technologies?

In this section, relevant literature on energy storage technologies was searched for China, the United States, Japan, and European economies. The specific numbers of collected literature are shown in Table A1. Table A1. Number of literature searches in the field of EST.
