

Real estate switching to energy storage job content

Can a green energy transition create jobs?

New builds can be intentionally designed for rooftop solar PV, substantially increasing the installed capacity of solar PV, as seen in the differences in jobs created between retrofits and new builds in Tables S2 and S3. In terms of national policy, understanding the potential for a green energy transition to create employment is very important.

Which energy sector provides the most jobs per investment?

As indicated in the table, energy efficiency options provide the most jobs per investment, followed by biomass and hydroelectric sources of electricity supply. Table 2. Comparison of employment multipliers across various energy sectors in the United States (full-time equivalent jobs/\$million investment in \$2015). Source: Brown et al. (2020).

What are the different types of jobs created by different energy sources?

The jobs created by different energy sources can also be differentiated as being direct, indirect, or induced. Direct job creation refers to sectors of the economy that are affected by direct economic activity due to higher investment. Indirect effects mainly include the materials and industry demand as a second-order effect.
