

Reddit solid state batteries

The future of sustainable transportation is here! This is the Reddit community for EV owners and enthusiasts. Join and Discuss evolving...

Solid state battery doesn't really mean anything because it doesn't have an agreed upon definition. It's most certainly not a lithium-metal battery or I would be amazed.

This is the Reddit community for EV owners and enthusiasts. Join and Discuss evolving technology, new entrants, charging infrastructure, government policy, and the ins and outs of ...

If you're in America, then I agree with the others posting that solid state battery based EVs are not coming to America anytime soon and do not see a reason to wait.

Toyota is working with Panasonic to develop Solid State Batteries and has gathered over 1,000 patents in SSB technology to make batteries that retain 90-percent battery ...

Solid-state batteries have existed for a long time. There are commercially-available devices, primarily for use in applications where the total energy storage requirements ...

A solid state battery is a newer type of battery that uses solid electrodes and a solid electrolyte, instead of the liquid electrodes and electrolyte found in a lithium ion battery.

Personally, I think anyone who is promising solid-state batteries for cars is either a scammer or being scammed but doesn't know it. The high-end smartphone world desperately needs higher ...

The consumer doesn't care whether his EV is propelled by NMC batteries, LFP batteries, solid state batteries or pixie dust. The consumer cares whether it gets the range and ...

Solid-state batteries have existed for a long time. There are commercially-available devices, primarily for use in applications where the total energy storage requirements are relatively ...

Solid-state batteries will likely show up on costly long-range cars first, and they will be similar to regular batteries. By the time they become commonplace, everyone waiting ...

Solid state batteries already exist but lithium ion technology has improved a lot over the last decade and is getting way cheaper to produce, so it doesn't make sense to roll ...

Edit: There's solid state batteries in electric buses on the road today made by multiple companies, Toyota does

Reddit solid state batteries

not list any range or charging stats for their solid state battery.

The future of sustainable transportation is here! This is the Reddit community for EV owners and enthusiasts. Join and Discuss evolving technology, new entrants, charging infrastructure, ...

Other manufacturers and battery companies are working on solid state too, it's just they have other vehicles and batteries in the pipeline for 1-4 years that aren't solid state batteries so they ...

Toyota is working with Panasonic to develop Solid State Batteries and has gathered over 1,000 patents in SSB technology to make batteries that retain ...
