

Ryobi 40v battery charger solid yellow light

What do the lights on a Ryobi Charger mean?

Well, let me help you out with this handy guide to what all of the lights on a Ryobi charger mean. The single solid red light means that the charger is on but there is no battery in it. If you see this light but there is a battery in then try taking it out and putting it back in to see if the battery wasn't quite seated right.

Why is my Ryobi Charger flashing red and green?

If the battery fails to charge or the charger shows an error, then your battery is faulty. If the battery charges up correctly, then your battery charger is the problem. The most common cause for your Ryobi Charger flashing red and green lights is that the battery has been over-discharged. This is commonly known as the battery is in "sleep mode"

How do I charge a Ryobi 40V battery?

It may seem obvious, but it is essential to ensure your battery is correctly inserted into the charger. Most Ryobi 40v batteries have a gray button (or buttons) that should be pressed down when inserting the battery into the charger. Push the gray buttons and slide the battery onto the charger- you should hear an audible click.

Why is my Ryobi 40V battery not charging?

Electronics can sometimes act strangely, and Ryobi chargers are no exception. If your Ryobi 40V battery isn't charging, first try unplugging the charger, wait for about a minute, then plug it back in. If this does not solve the problem, move on to the next steps. There are two ways that you can check if your battery charger is faulty or not.

Why does Ryobi flash red light?

As this guide will soon show, some flashing LEDs are innocuous. Ryobi flashes red light because the battery is either too hot or too cold. The red light also flashes when you insert the battery into the charger. You can also expect red light when you insert an abnormal battery into the charger.

Why does my Ryobi charger have an orange light?

Orange LEDs flash when the rechargeable C batteries fail to charge. You can determine their health by analyzing them with a battery tester. If they are dead, get a replacement. However, most Ryobi chargers use red and green LEDs. They don't have an orange light. More than likely, you have confused the red light for an orange glow.

If you have just got yourself a Ryobi power tool then you may well be wondering just what all the flashing lights on the charger mean. Well, let me help you out with this handy guide to what all of the lights on a Ryobi
