

Saft solid state battery

The company maintains dedicated research facilities focused on developing next-generation battery technologies, including work on solid-state batteries and advanced electrode materials.

In France, scientists, engineers and technicians at our Bordeaux site are currently working on the next generation of high-energy lithium-ion cells with a liquid electrolyte ...

Extremely safe cell chemistries, such as all solid-state batteries in pouch cell format, are under development. Saft's vision is to provide electrochemical solutions and custom-made pouch cell ...

In France, scientists, engineers and technicians at our Bordeaux site are currently working on the next generation of high-energy lithium-ion cells with a liquid electrolyte and a true...

3.2. Objective of the activity ent of solid-state lithium metal batteries for space application. The aim of the project was to develop a solid-state prototype cell with a specific energy of more than ...

Since 2018, Saft has been at the forefront of an innovative program: the development of solid-state batteries. This groundbreaking technology is a significant step toward establishing a ...

Designing and producing a solid-state battery is the aim of the ELIAS project, led by Saft and implemented by a consortium of academic and industrial players. This ...

Saft's EUR210M solid-state battery program targets 500kW fast-charging for electric ferries. Partnering with Naval Group, they've developed seawater-activated emergency power ...

Perhaps the most exciting is our work on solid-state batteries. Why is Saft so excited about solid-state batteries? Currently, any kind of rechargeable battery - nickel-based, lead-acid or Li-ion - ...

Saft said that to build European leadership in this domain, with disruptive technologies, innovative products and state-of-the-art industrial processes, the alliance will ...

Running a current through a solid would remove these obstacles and produce non-flammable batteries that would be even denser, have a longer life and cost less to manufacture.
