Can a solar panel connect to a 12V battery?

Technically,you can connect a solar panel directly to a 12v battery as long as it's not more than 5 watts,but connecting any higher-rated panels is not a good idea. Solar panels will produce varying voltage outputs depending on the amount of sun hitting them,and this dipping and spiking of the voltage can quickly damage your battery.

Does a 100W solar panel work with 12V batteries?

A 100W solar panel typically needs a 10A charge controller with a 30V minimum solar input to work with 12V batteries. A 150W (3x 50W) solar panel array can use a 20A charge controller for 12V batteries (10A for 24V batteries). Connecting the panels in series works for both 12V and 24V batteries as long as the MPPT is capable of handling 80V.
