

Solar and battery packages

What is included in a solar package?

Solar packages include everything you need to get your residential system up and running. Simply determine your required energy use and select the solar kit that is right for your home. SunWatts can help you find and install the perfect solar kit for your home.

What is a complete solar system kit?

Complete solar panel system kits that are the most energy efficient and reliable on the market today. Solar packages include everything you need to get your residential system up and running. Simply determine your required energy use and select the solar kit that is right for your home.

What types of batteries are used for solar energy storage?

There are several types of batteries commonly used for solar energy storage, each with its own unique characteristics and advantages. Lithium, Flooded Lead-Acid and Sealed Lead Acid batteries are three primary technologies used for solar energy storage, each with distinct characteristics.

Should I buy a battery with my solar kit?

Purchasing a battery along with your solar kit offers a pathway to energy independence from your utility company, especially when they provide a meager buyback rate for surplus energy you send to the grid. With a battery storage system in place, excess solar energy can be stored instead of sold to the utility for low rates.

What is a solar battery backup system?

Solar battery backup guarantees a power source-- even during a grid service failure or natural disaster. When the grid goes down, a solar battery backup system automatically detects and transitions your solar system from grid power to backup power. Protect your home from outages with our solar battery backup kits. Shop What's in a kit? FAQ

What are pre-made solar kits?

Look no further than our pre-made solar kit packages. These all-inclusive solar kits are designed for simplicity, featuring everything you need for a seamless setup and installation.
