

# Solar batteries price

How much does a solar battery cost?

A fully-installed 13.5 kWh solar battery costs \$13,500 on average, after claiming the 30% tax credit. This price can vary from project to project as there are many factors that influence battery storage costs. Update: The homeowner-claimed tax credit for home battery storage is only available until the end of 2025.

Is solar battery storage worth the cost in 2025?

Whether solar battery storage is worth the cost in 2025 is totally up to you and your energy goals. If you experience frequent or long-lasting power outages, then having battery storage for backup power can be a game-changer in keeping you safe, productive, and comfortable (not to mention keeping your food from spoiling!).

How much does solar battery maintenance cost?

The cost to hire a local solar company to inspect and maintain your battery system is anywhere between \$150 and \$300 on average. Solar batteries last longer when you maintain them regularly. Maintenance includes an inspection, rotating the batteries, and cleaning the terminals.

How much does a battery system cost?

Battery systems can range from 5 to 40 kWh, depending on your energy needs. Battery prices also vary by brand, capabilities, and installation factors. We'll explore these factors later. On average, it costs around \$1,300 per kWh to install a battery before incentives. With the 30% federal tax credit applied, the cost is closer to \$1,000 per kWh.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit--which expires for batteries installed after December 31, 2025--for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. \*The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).

We'll break down the costs of some popular solar batteries and detail everything you need to know to determine whether adding storage to your renewable energy system is worth it.

Most homeowners spend an average of \$10,000 on solar battery costs, though prices typically range between
