How much does a solar battery cost in Australia?

Let's break down the real costs, the influencing factors, rebates, and whether investing in battery storage is a smart move today. The average solar battery price (installed) in Australia in 2025 is sitting between \$800 and \$1,200 per kWh. That means for a standard 10kWh system, you'll typically pay between \$8,000 and \$12,000 installed.

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

Is a solar battery a smart upgrade for Australia's 4 million homes?

With electricity prices up 20% in NSW and Queensland since 2023, a solar battery is a smart upgrade for Australia's 4 million solar homes. The federal Cheaper Home Batteries Program slashes costs, making now the perfect time to invest.

What is a typical solar battery size in NSW?

The typical size of PV systems for households in NSW is between 6.6kW and 13kW. By considering the efficiency and type of solar panels used, and the amount of sunlight available, homeowners can ensure they select the right solar battery size that complements their solar panel capacity.

What is the WA solar battery rebate?

The WA solar battery rebate provides an additional saving off the install price of the battery. Synergy customers can save a further \$130 per kWh while Horizon customers can save a further \$380 per kWh. The WA rebate taps out at a maximum of 10 kWh of battery storage. It's not just the rebates that impact the installation cost of a battery.

Find out how much solar batteries cost in Australia, what affects the price, and whether they're worth it for your home. Updated 2025 pricing and advice.
