How much does a lithium solar battery cost?

A lithium solar battery costs between Php 91,235 and Php 304,119. This model is used for applications requiring high electrical power, such as powering industrial machinery, weighbridges, or boats. A lithium solar battery has a 90% discharge depth. It resists temperatures between -10 and 70°C.

Where to trade solar equipment in the Philippines?

The Philippines is an archipelago so there are plenty of seaports to facilitate trade and logistics of solar equipment. The top ports in the Philippines include Port of Lucena. Discover how SUNESS Battery's influence in Philippines market is expanding, transforming lives!

What are the different types of solar batteries?

There are two major types of solar batteries: lithium-ion and lead-acid. Out of these two options, lithium-ion batteries are considered ideal for a solar battery storage system. The most popular for energy storage, lithium-ion batteries have the longest lifespan. These batteries are also quite compact and light compared to other battery types.

Why does the Philippines have a growing solar market?

The Philippines' growing solar market is due in part to the Philippine Energy Plan that has outlined the policies and steps needed for the country to reach its target of 20 GW renewable energy by 2040 (or 15 GW by 2030). As of 2021, the country's solar energy generation capacity is at 1.2 GW.

How much does a lead-acid solar battery cost?

The open lead-acid solar battery costs between Php 9,123 and Php 24,329. This battery is used by second homes, isolated sites, and public establishments. It has a lifespan of 3 to 4 years and benefits from a number of cycles between 300 and 500. It has a discharge depth of 50 and 80% and withstands temperatures from -5 to 30°C.
