How much does a solar battery cost in Australia?

In 2025, the solar battery cost for Australian households starts from \$4,500, with larger systems exceeding \$12,000. This variation depends on battery size, brand, and whether it's installed alongside solar panels or retrofitted into an existing system. There are two key rebates that can help reduce the cost significantly:

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

How much does a battery loan cost in Victoria?

Victoria: In Victoria, eligible households can access an interest-free battery loan of up to \$8,800. This loan helps spread the cost of the battery system over time, easing the financial burden on homeowners. Explore Victoria solar incentives.

How much is a battery rebate in Victoria?

Federal Battery Rebate: Offers up to \$372 per usable kWh, which can equal \$3,300-\$4,000 off for a typical 10-13kWh system. Solar Victoria Rebate: A flat \$2,950 available to eligible households in Victoria. Prices include installation. Rebates vary depending on your eligibility and location.
