How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit--which expires for batteries installed after December 31, 2025--for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. \*The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).

How much does a battery system cost?

Battery systems can range from 5 to 40 kWh, depending on your energy needs. Battery prices also vary by brand, capabilities, and installation factors. We'll explore these factors later. On average, it costs around \$1,300 per kWh to install a battery before incentives. With the 30% federal tax credit applied, the cost is closer to \$1,000 per kWh.

Why are solar batteries so expensive?

There are a handful of factors that influence the price of solar batteries, but perhaps the greatest reason they are expensive is simply because residential-scale batteries are a newer technology, and new technologies tend to be expensive at first before rapidly falling in price as the market matures.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.

Most homeowners spend an average of \$10,000 on solar battery costs, though prices typically range between \$6,000 and \$12,000. The total cost includes the battery system itself and the labor to install it. Whether you're
