

Solar battery rebate tas

What is a solar power rebate Tasmania?

The solar power rebate Tasmania helps reduce the upfront cost of installation, making it easier for households and businesses to invest in renewable energy. This blog explains what solar rebates in Tasmania are, how much you can save, the eligibility criteria, and the steps to apply.

Does Tas have state-based rebates?

As mentioned above, TAS does not have state-based rebates. So, all eligible homeowners and businesses receive the Federal Government STCs. STCs are tradable certificates awarded to your solar system as part of a sales discount. Every solar system is awarded a certain number of STCs depending on its size. You can see this in the table above.

What is a solar rebate & how does it work?

The only incentives available will be the Federal Government's STCs. Found eligible, this Solar Rebate scheme will subsidise households and businesses a GENEROUS amount that effectively reduce the upfront cost of installing solar panels, solar hot water and even solar batteries.

Why does Tasmania have lower solar rebates compared to other states?

Tasmania has lower solar rebates compared to other states in Australia. This is because, being in zone 4, it receives the lowest STCs than the other zones. TAS shares these STCs with VIC and a small part of WA. Below are the 4 STC zones in Australia to give you a better understanding.

What is a solar rebate or subsidy?

A rebate or subsidy will cover part or all of the upfront cost of buying solar or a battery. Rebate schemes operated by states, territories and local governments sometimes only apply to particular groups of people or types of housing, such as social housing, rental properties or apartments. Eligibility criteria may relate to:

How much does a 5kW Solar System cost in Tasmania?

For instance, a 5kW solar system in Tasmania would cost \$7,920, but you will get it at \$6,524 as the installer will have already factored in the \$1,397 rebate they will receive after installing the system for you. Most homeowners and businesses prefer this option as it is easier and more convenient. This is because:

You may wish to talk to your solar or battery installer about federal government policies, including the eligibility of different systems for federal government rebates and how to access them.
