

Solar battery recall

How many batteries have been recalled?

About 7,500 batteries have already been recalled and about 10,000 additional batteries are affected by a proposed diagnostic software remedy which electrical safety regulators are assessing. The batteries are installed in homes primarily as part of a solar energy system to capture and store renewable energy.

What happens if a solar energy battery is recalled?

Homeowners should immediately switch off their solar system battery if it is under the LG solar energy battery recall. These solar ESS batteries can overheat and catch fire without warning, which could lead to serious injuries, property damage or even death. We want consumers to be aware of the recall and the risks.

What is a recalled battery?

These batteries are installed in homes mainly to capture and store renewable energy from solar panels. The recalled batteries were supplied to Australian consumers in solar energy storage systems under brands such as LG, SolaX, Opal, Redback, Red Earth, Eguana or VARTA, as well as in unbranded systems.

Are solar batteries recalled in Australia?

A series of batteries included in solar power systems in thousands of Australian households has been recalled. The recall of the product by electronics company LG prompted plans for the consumer watchdog to contact customers amid fears they could catch fire.

Are LG solar ESS batteries affected by a recall?

Certain LG large lithium-ion batteries are affected by the recall--particularly LG solar ESS batteries manufactured from January 2016 onwards. Around 6,400 batteries are yet to be diagnosed or replaced. These batteries are installed in homes mainly to capture and store renewable energy from solar panels.

Are recalled LG solar lithium-ion batteries a fire risk?

Following a recommendation by the ACCC, the Assistant Treasurer, the Hon. Stephen Jones, has today issued a national safety warning notice to warn consumers of fire risks associated with recalled LG solar lithium-ion batteries which are installed in solar energy systems across the country.
