Can I add solar battery storage to my home power system?

With battery backup and non-backup options available, SunPower makes it easy to add energy storage to any home. Learn more about the benefits of adding solar battery storage to your home power system.

Who is Hudson solar & battery solutions?

"They were very accommodating and respectful of our needs--probably the best contractors I've had work on our home." Hudson Solar + Battery Solutions empowers energy independence and resilience through premium solar and battery systems.

Why do you need a solar battery bank?

The right battery can help meet your energy needs by storing excess solar energy generated by your solar panels, allowing you to power your home with solar even when the sun isn't shining. A well-designed battery bank can also help reduce energy costs by optimizing energy usage and minimizing reliance on the grid.

How many solar batteries do I Need?

Like solar panels, the size of your system (how many solar batteries we recommend you get) will depend on your unique battery and backup power needs. Factors such as the amount of electricity you use at home and the devices and appliances you want to back up will play a key role in designing your ideal battery storage system.

Do you need a solar battery backup system?

While full off-grid living requires significant battery storage, most homeowners find that staying connected to their local utility with a battery backup system is the most practical and cost-effective option. A trusted solar installer can help design the right setup for your needs. How do home solar batteries work?

What is the best battery for a solar panel?

At 18 kWh, the SolaX Power T-BAT H battery offers the most capacity in a single module--one battery can store more than enough backup power for most homes. Its AC-coupling makes it compatible with retrofit installations, making it an excellent choice for those adding storage to an existing solar panel system. It has a solid 12-year warranty, too.
