

Solar battery storage installer devon

Why should you install a solar panel & battery storage system?

Installing a solar panel and battery storage system to your house can provide financial, environmental, and practical benefits. It can lower energy bills, offer energy independence, increase your EPC rating, reduce your carbon footprint, and provide backup power.

Do you install solar panels & retrofit home batteries?

We work with various solar panels and retrofit home batteries to maximize energy efficiency. We install home and commercial batteries to store excess solar and off-peak energy. A battery stores energy until needed, and we offer industry-leading brands to fit any budget.

How many solar panels & 5kW battery storage have you saved?

With 11 solar panels installed and 5KW battery storage we have saved almost £1000 in the first 12 months. We used Sun Energy to install 120 kw of solar onto our property roof at Brixham Trawler Agents. The work they had to do was get the correct planning, liaise with the local council and then design the best possible solution for us.

What can you do with a solar battery?

Turn sunlight into savings with a battery - power your home with solar and monitor it all from your phone. Plus, earn cash selling surplus energy back to the grid. Call us now to find out more. Transform your garage into a personal fueling station and wake up every day to a fully charged electric vehicle.
