

# Solar battery tax credit 2024

Do solar batteries qualify for a tax credit?

A vast majority of batteries installed between 2022 and 2032 will qualify for the solar tax credit expanded by the Inflation Reduction Act. The only qualifications specified by the Inflation Reduction Act are that the battery must be installed in a taxpayer's residence in the US, and the capacity of the battery storage must exceed 3 kWh.

Are solar panels a tax credit for 2025?

A July 2025 report published by the Department of Energy predicts 100 times more power outages by 2030 compared to today. Similar to solar panels, batteries must be installed by January 1, 2026 to claim the 30% federal tax credit.

Are solar batteries tax deductible?

This includes batteries powered by solar panels as well as standalone storage, meaning devices you can plug into the grid. In years past, home battery systems had to be charged by renewable energy sources like wind or solar in order to qualify for the 30% tax credit.

How do I qualify for a solar panel tax credit?

In order to qualify for the solar panel tax credit, you must own your home (not lease or rent) and you must pay enough taxes to the federal government (tax liability) that the Residential Clean Energy Credit can offset your tax payment.

When does the federal solar tax credit expire?

With the signing of the Inflation Reduction Act of 2022, the ITC was renamed the Residential Clean Energy Credit, the value was increased to 30%, and the deadline was extended through December 31, 2034. How Does the Federal Solar Tax Credit Work?

Can you get a 30% tax credit on solar?

The clock is ticking on one of the biggest solar incentives in American history. Homeowners have until January 1, 2026 to claim the 30% federal tax credit--a benefit that can shave thousands of dollars off your solar investment.
