

Solar car battery charger argos

Should you use solar car battery chargers?

The sun is a near-unlimited source of free electricity, which makes the idea of using solar car battery chargers so tempting. If you need to charge your car's battery but don't want to plug in a traditional car battery charger, one of these clever solar panels on your dashboard can supplement battery life, preventing a flat battery.

Which solar charger should I buy?

The PV Logic is easy to use and store and performed well at a reasonable price. For use outside the car, the Photonic Universe 10W would be our choice, with the Topsolar panel close behind. Solar chargers are incredibly useful but should the worst happen then you will need a jump starter pack.

What is a good 10W solar charger?

Another great 10W option is this solar charger from Eco-Worthy. Not only is it waterproof, but it's also suitable for boats, tractors, ATVs, and loads of other vehicles using a 12V battery. Like the others, bar the CTEK setup, you can easily mount this on the inside of your windscreen and let the power of the sun do the rest.

Can a solar maintainer charge a flat battery?

Which is where a solar maintainer could come in handy. These are not designed to charge a flat battery but should help with the natural discharging and power used by alarms, dash cams and clocks. So which of these six solutions is the one to keep your car battery topped up?

Can solar panels prevent a flat battery?

If you need to charge your car's battery but don't want to plug in a traditional car battery charger, one of these clever solar panels on your dashboard can supplement battery life, preventing a flat battery. This idea used to be reserved for particularly eco-minded vehicles, but now there are a raft of aftermarket examples available.
