

Solar panel battery storage durham

Do solar PV systems work in the UK?

Yes!!!Solar PV systems work very effectively in the UK,though the electricity produced is obviously lower than in sunnier countries. There are now thousands of systems throughout the UK,where customers are reaping the benefits of their solar electric system AND claiming a tax free income from the Feed In Tariff.

What is the warranty on solar panels?

Most solar panels come with a 25-30 yearguarantee and inverters generally have a 5-20 year guarantee depending on the manufacturer. Sustainable Energy Engineering provides a 10 year customer workmanship warranty on all its installations.

How does a solar PV system work?

Most Solar PV systems are grid connected; this enables the solar generated electricity to be fed directly into a building's existing mains supply. Power generated from a Solar PV system reduces the amount of electricity that your household imports from the grid subsequently cutting the cost of your bills.
