

Solar panels and battery storage wales

Who installs solar panels in North Wales?

Here at Applegarthwe are expert installers of solar panels and solar pv systems in North Wales. We have been installing solar panels in North Wales for over 15 years. Our highly experienced engineers can install both roof mounted and ground mounted solar pv systems for domestic and commercial clients.

How much do solar panels cost in Wales?

Solar panels cost £7,138 on average in Wales for a 3.5 kW solar panel system, including installation. Solar panels continue to fall in price, which is great news as 69% of people ranked cost as the most important factor when evaluating which low-carbon product to purchase.

What battery storage options does Cymru solar offer?

Cymru Solar now has a range of battery storage options available from top manufacturers, including: Tesla, Solar Edge, SMA, Growatt, LG, GivEnergy, Solax, Huawei, ... Contact us if you would like more information. We are always happy to help, you can call on 0800 023 8977.

Are solar panels a good investment in South Wales?

Well, yes, they are. Solar panels in South Wales or North Wales are a viable investment despite the area's bad weather reputation, as the region enjoys a fairly good number of sunlight hours compared to other places in the UK.

How long do solar panels last in Wales?

The average home will break even on solar panels in Wales after 13.88 years. This compares favourably to the UK average, which is 15.66 years. If you spend more time at home or work from home, your payback period could be even shorter, between 6 and 10 years (depending on energy use).

How many homes in Wales have solar panels?

According to the Microgeneration Certification Scheme (MCS), around 100,000 homes in Wales have solar panels, which is around 7.5% of households. Anglesey, Ceredigion and Powys are the areas in Wales with the highest rate of solar panels. In Anglesey, 16.34% of homes have solar panels, which is the third highest rate of any area in the UK.
