

# State power investment corporation energy storage investment

What happened to China Power Investment Corporation (SPIC)?

China Power Investment Corporation was the surviving legal person, but renaming to State Power Investment Corporation, while State Nuclear Power Technology Corporation became a subsidiary. SPIC also re-incorporated as a limited company from Industrial Enterprise Owned by the Whole People legal form in 2017.

Who owns China Power Investment Corporation (CPI) & SNPTC?

In 2015 China Power Investment Corporation (also known as CPI Group) and State Nuclear Power Technology Corporation (abb. SNPTC) merged. Before the deal, they were both directly owned by and majority controlled by the State-owned Assets Supervision and Administration Commission of the State Council respectively.

Can new energy storage help build a new power system in China?

New energy storage, or energy storage using new technologies, such as lithium-ion batteries, liquid flow batteries, compressed air and mechanical energy, will become an important foundation for building a new power system in China, Lin said.

How many kilowatts a year is energy storage?

According to the NEA, the total installed capacity of new types of energy storage projects reached 8.7 million kilowatts with an average power storage period of 2.1 hours last year, an increase of over 110 percent from the end of 2021.

Where can China install new energy storage capacity?

Besides Inner Mongolia, Shandong, Guangdong and Hunan provinces as well as the Ningxia Hui autonomous region are areas ranking in the first-tier group for installing new energy storage capacity in China.

Can new energy storage complement pumped-hydro storage?

Liu Yafang, an official with the National Energy Administration, said that compared with traditional pumped-hydro storage, new energy storage can complement pumped-hydro storage and address the randomness and high volatility issues brought by the integration of new energy sources into the power system.
