What are sealed AGM batteries?

Sealed AGM batteries are ideal for grid-tied solar systems with battery backup. They provide exceptionally reliable deep cycling performance and deliver the ultimate quality for your solar energy system.

What are AGM deep cycle batteries?

Absorbed Glass Mat (AGM) deep cycle batteries are a type of sealed battery that are gaining popularity due to their decreasing prices and ease of maintenance. They are ideal for use in grid-tied solar systems with battery backup.

What are AGM super cycle batteries?

AGM Super Cycle batteries are the result of recent battery electrochemistry developments. They are designed to withstand deep discharge and recharge cycles. Tests have shown that these batteries can withstand at least three hundred 100% DoD cycles and then a recharge with $I = 0,2C_{20}$.

Are AGM batteries suitable for solar use?

AGM batteries for solar are a cost-effective, high-performance alternative to lithium batteries and an excellent choice for both full- and part-time residences. With 50% being the standard for flooded lead acid batteries and 80% being the low end of the standard for lithium batteries, AGM batteries offer a good balance between cost and performance.
