

# Tesla battery purchase

Are Tesla batteries road tested?

Every battery that we sell is road tested prior to sale and installation to ensure component functionality and maximum performance. Range of the Tesla battery will vary based on location, temperature and driving habits. We do our best to accurately describe how much range you will get, but even new Tesla's don't get the marketed range.

Does Tesla Model 3 have a remanufactured EV battery?

Remanufactured EV battery for Tesla Model 3 2017-2024. 18-48 month limited mileage warranty.

How much does a home battery cost?

One of the most popular home battery options is the Tesla Powerwall, a sleek lithium-ion battery that holds 13.5 kilowatt-hours (kWh) of energy. The Tesla Powerwall 3 costs about \$15,400 before incentives and taxes are considered. At \$1,140 per kWh of storage, the Powerwall is one of the most affordable home battery solutions available.

Should I upgrade my Tesla Model S 12V battery?

It's time to upgrade your 2012 (up to May)-2021 Tesla Model S 12V battery with a replacement, ultra-lightweight, and performance 12V lithium battery! Weighing in at only 10.0 lbs versus Model S's super-heavy 29 lb lead-acid 12V battery, Ohmmu's 12V lithium battery is the battery that Tesla should have shipped from the factory!

How much does a Tesla Powerwall cost?

The Tesla Powerwall 3 costs about \$15,400 before incentives and taxes are considered. At \$1,140 per kWh of storage, the Powerwall is one of the most affordable home battery solutions available. The combination of its cost and popularity earned it the first place spot in our list of the Best Solar Batteries of 2025.

Does the Tesla Powerwall have a warranty?

The Tesla Powerwall is backed by a 10-year warranty that guarantees that the battery will retain at least 70% of its capacity by the end of the warranty period. The unlimited cycle warranty is valid only if the battery is used for solar self-consumption, time-based control, and backup reserve.
