

# The latest profit situation of energy storage companies

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

How do I evaluate potential revenue streams from energy storage assets?

Evaluating potential revenue streams from flexible assets, such as energy storage systems, is not simple. Investors need to consider the various value pools available to a storage asset, including wholesale, grid services, and capacity markets, as well as the inherent volatility of the prices of each (see sidebar, "Glossary").

Are energy storage and battery technologies comparable?

However, because different energy storage and battery technologies are easily comparable in terms of their economic viability, it makes sense to use a cohort of battery tech companies to try and gauge the median multiples for the sector.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Should energy storage be undervalued?

The revenue potential of energy storage is often undervalued. Investors could adjust their evaluation approach to get a true estimate--improving profitability and supporting sustainability goals.

Given that many of these companies remain private for their whole lifetime, sometimes never posting their own revenues, it's particularly ...

6 &#0183; Company profile: Since 2008, as one of top 10 household energy storage manufacturers in China, BYD energy storage has focused on the research and development ...

The Billion-Dollar Question: Is Storage Worth the Hype? Consider this: SPGES's latest project boasts 19.98% internal rate of return [1]--better than most tech startups. But for ...
