

Tokyo electric power company invests in us energy storage

Will Japanese gas buy US battery energy storage system longbow?

Corrects purchase price in second paragraph. Japanese gas and energy supplier Tokyo Gas plans to acquire US battery energy storage system (BESS) company Longbow in Texas, targeting to begin commercial operations of the system during the latter half of 2024.

When will Itochu launch its first energy storage station?

Going forward, the plan is to launch the first energy storage station around fiscal 2025, and then proceed with the development and operation of energy storage stations one after another. ITOCHU has developed a product lineup that meets market needs, from home storage batteries to large-scale energy storage systems for industrial and grid use.

How will Tokyo Gas's acquisition impact consolidated performance in 2024?

The acquisition is scheduled within this year and commercial operation is aimed for within 2024. As this project will utilize the USA tax incentive program, Tokyo Gas's actual investment in the project will decrease. The impact of the transaction on consolidated performance for the fiscal year is expected to be relatively small.

Which companies are involved in the battery storage verification project?

Eurus Energy and its parent company - Toyota Tsusho - will carry out the installation, with Toyota, TEPCO, Eurus and Toyota Tsusho all playing an active role in the battery storage verification project. Eurus Energy's Tashirotai wind farm, where the BESS will be installed. Image: Eurus.

Can TEPCO HD & Toyota use a stationary storage battery system?

To this end, TEPCO HD and Toyota have jointly developed a stationary storage battery system that can be used in combination with existing PCS *2 by connecting multiple storage batteries for electric vehicles.

What is the GI Energy Storage fund?

The Fund is managed by GI Energy Storage Management, which was jointly established with Gore Street Capital (GSC), and is Japan's first dedicated fund that handles everything from investment and development to operation in new energy storage plants (including those with renewable energy facilities) in the Kanto area and elsewhere.
