The article discusses Toyota's research in solid-state batteries over the years, including breakthroughs, partnerships, and challenges.

Toyota says its breakthrough batteries will hit the market in 2027 or 2028, giving its EVs 745 miles of range--significantly greater than any gas-powered car today--with 10-minute charging times.

Toyota is working toward the first use of true solid-state battery technology on its hybrids or plug-in hybrids--not on battery electric models.

Toyota is currently an industry leader in developing solid-state batteries that will minimize charge times and maximize range.

Toyota is aiming to introduce solid-state batteries in 2027, which will be capable of ultra-fast 10 minute recharge times from 10 to 80 percent state of charge.
