

Vivint solar price per kwh

How much does a Vivint Solar System cost?

These numbers are based on average system sizes and installation costs for the solar panel brands Vivint carries. These prices fall below the industry average of \$20,979 for a similarly-sized system, meaning Vivint is below average when it comes to cost.

Is Vivint Solar a good choice?

Yes. For those who want a smarter, more tech-forward approach to solar energy, Vivint might be a good option. Each solar energy system includes a free Vivint home security system kit and access to the Vivint Solar app. How do I know I can trust these reviews about Vivint Solar?

What type of solar panels does Vivint Solar use?

The panels that Vivint Solar uses are Monocrystalline panels and are considered the most efficient type that the current solar market has. In addition, the panels are made to be sleek looking so that they will not stand out or look evident on the roof of your home.

Does Vivint offer a solar lease?

One of the upsides of Vivint and its parent company, SunRun, is that they make solar super accessible to a wide range of customers. Although the solar leases they push on customers aren't as beneficial as other options, they require no down payment and often no credit check and they provide instant energy savings in most cases.

How does Vivint Solar work?

Before installation, a Vivint professional visits your home to review your equipment needs and finalize your system design. From there, its team handles everything from permits to the actual installation process. Vivint Solar offers bundles that combine solar and home security services.

Does Vivint Solar have a BBB rating?

Listed are the states Vivint offers solar installation: Vivint Solar is not currently rated with the BBB. This is a concern for some customers, but it should be understood that the BBB ratings are typically voluntary for companies. There are, however, quite a few reviews for both Vivint Solar and Sunrun.
